

## **Notice of Construction**

### **Ivanhoe Drive Reconstruction**

The City of North Bay has awarded Ed Seguin & Sons Trucking & Paving the contract for the reconstruction of Ivanhoe Drive. The project includes the full replacement of the storm sewers, sanitary sewers and watermains and full reconstruction of the roadway with curbs and gutters.

The contractor will mobilize to site in early May to begin construction. It is anticipated that the project will be substantially completed by December 2022.

The contractor will try to limit the extent of noise and other construction inconveniences during this project, but in order to complete construction in a timely manner, night work and weekend work may be approved as required. The contractor will assist in garbage collection and temporary parking to residents when necessary.

There will be a city inspector available on site for the duration of the contract to liaise with the public. The contractor may need to access your property at times to perform their work.

The City and the contractor are committed to public safety. We urge all to drive with care in the construction area. Parents are reminded to keep a close watch on children and to teach them about the hazards associated with an active construction zone. Do not hesitate to contact the city inspector or the site contractor if there is a public safety concern.

Municipal police, fire and emergency medical services are aware of the scope and duration of construction. The City and the contractor will monitor ongoing progress of construction to ensure that emergency responders are not hampered.

Trees, shrubs, gardens, fences, structures, etc. that are currently located on City property may be removed during construction. If you wish to preserve plantings or items located on City property, please move these items to your property prior to construction. The City of North Bay is not responsible for any replacements due to damage as a result of construction activities.

Should you have any questions or concerns please do not hesitate to contact the project manager listed below.
