

## **Notice of Construction**

### **Trout Lake Road Rehab/Reconstruction Mountainview Dr to Lees Rd**

Ed Seguin & Sons Trucking & Paving Ltd. has been awarded the contract for the rehabilitation and reconstruction of Trout Lake Road from Mountainview Drive to Lees Road including the addition of bike lanes and the replacement of the storm sewer system adjacent to the large concrete retaining wall in front of the Average Joe's restaurant. The contractor is scheduled to mobilize to site in May to begin construction and will complete the works by the end of October of this year.

The contractor will try to limit the extent of noise and other construction inconveniences during this project, but in order to complete construction in a timely manner, night work and weekend work may be approved. There will be delays and changes in traffic movement due to the required reduction of traffic lanes through the construction zone, however no road closures or detours are anticipated at this time. The contractor will assist in garbage collection and temporary parking to residents and businesses when necessary.

Drive with care in the construction area and parents are reminded to keep a close watch on children and to teach them about the hazards associated with an active construction zone. There will be a city inspector available on site for the duration of the contract to liaise with the public. The contractor may need to access your property at times to perform their work.

Municipal police, fire and emergency medical services are aware of the scope and duration of construction. The City and the contractor are committed to public safety and will monitor ongoing progress of construction to ensure that emergency responders are not hampered.

Trees, shrubs, gardens, fences, structures, etc. that are currently located on City property may be removed during construction. If you wish to preserve plantings or items located on City property, please move these items to your property prior to construction commencing. The City of North Bay is not responsible for any replacements due to damage as a result of construction activities.

Should you have any questions or concerns, please contact the project manager listed below.
